

# EMSL INTEGRATION 2012

Discovery at the intersection of biology, energy and environment

## JOIN US

Aug. 14-15, 2012  
Richland, Washington

The EMSL user meeting is designed to facilitate scientific discussion of how EMSL capabilities are enabling new scientific discoveries in biology; communicate EMSL's future directions and new capabilities to users and potential users; and expose post-graduate and graduate students to advanced instrumentation and innovative science.

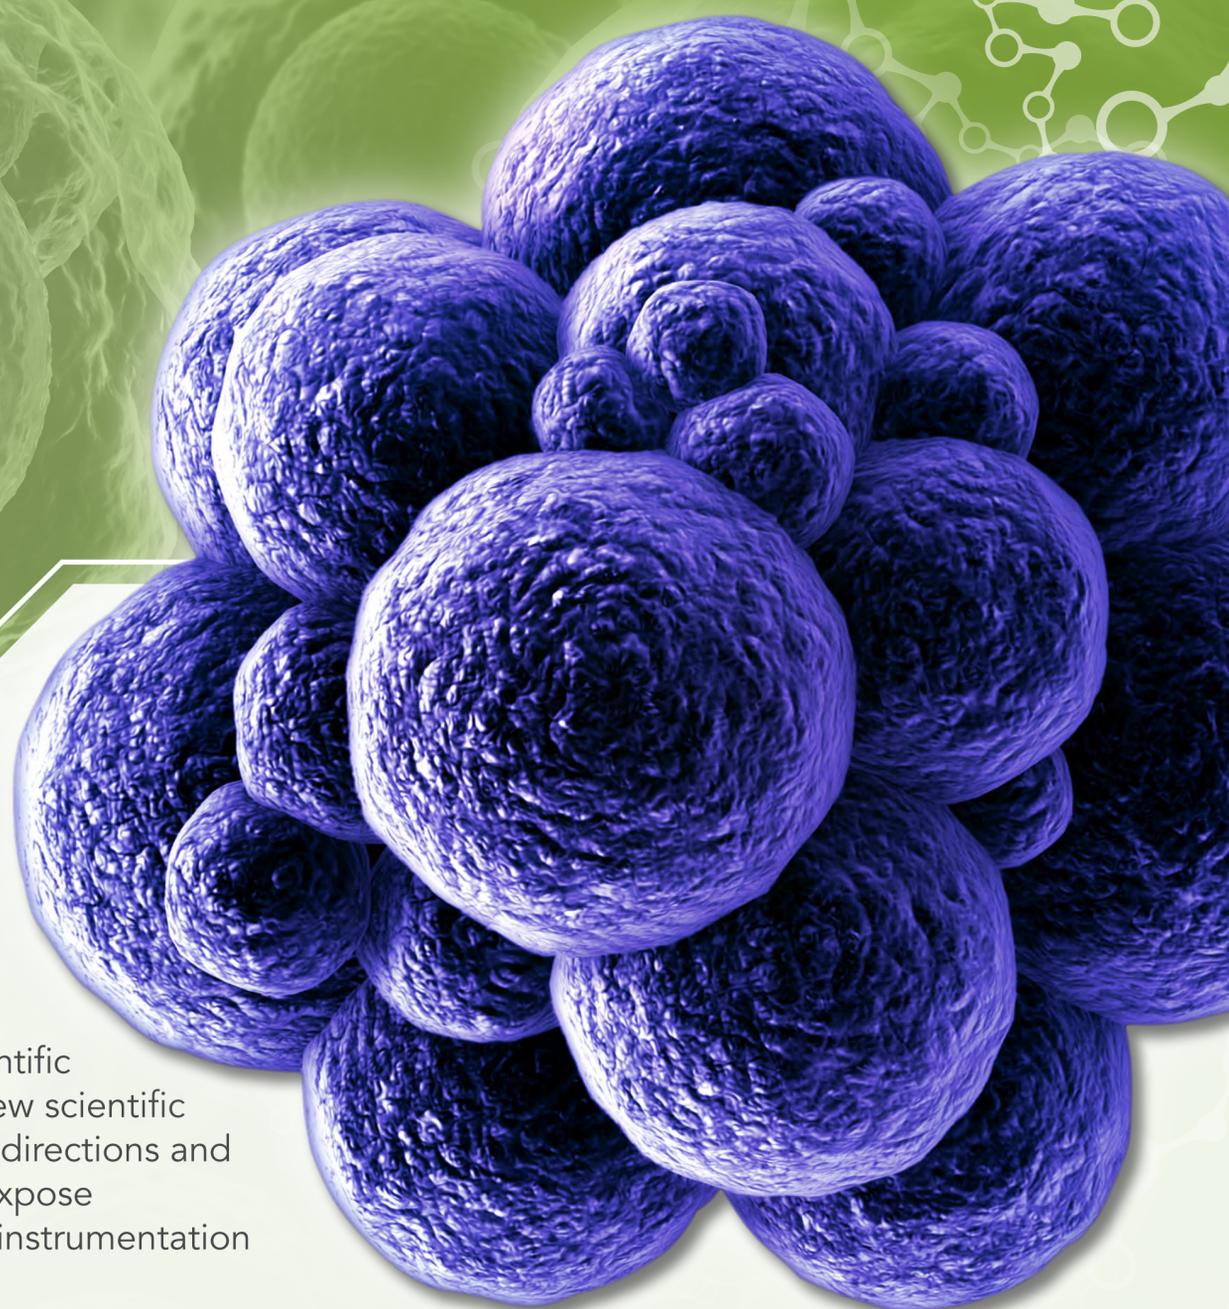

### Keynote Speaker:

**Jay Keasling**, CEO of the Joint BioEnergy Institute

Participate in workshops focused on

- transcriptomics
- super resolution fluorescence microscopy
- helium ion microscopy
- mass spectrometry
