

# MONet

Modeling from  
Elements to  
Ecosystems

## MONet Environmental and Regulatory Compliance process

1

### **Applicants provide the following information at NEXUS portal:**

- Latitude/longitude
- Is site on federal property?
- Is site privately owned but federally funded (LTER sites)
- Are there existing access agreements?

2

### **PNNL will:**

- Work with the appropriate State Historic Preservation Office (SHPO) to determine if there are cultural or historical properties near the site
- Assess location for Endangered Species
- Work with applicant to utilize current project or institutional resources for compliance

3

### **PNNL assesses if site will:**

- Require a full Review, based on NHPA section 106
- Require a consultation based on Endangered Species Act, section 7
- PNNL will assist with Federal, State, or private access permissions, reviews, or other documentation prior to sampling

4

### **MONet Project Stewards will:**

- Assess applicant information along with Environmental Compliance regulatory needs prior to project approval
